(54) Title: MAGNETICALLY ATTRACTABLE COMPONENTS FOR JEWELRY ARTICLES

(57) Abstract: A magnetic jewelry-forming component for preparing a jewelry article. The article includes a body member configured and dimensioned in an ornamental shape and having a first magnetizable portion for attractive repulsive magnetic association with at least one other magnetic jewelry-forming component and at least one further element for magnetically coupling to the at least one other magnetic jewelry-forming component. Advantageously, the body member has a magnetic strength that can be overcome by a person's hand strength such that the body member and at least one other magnetic jewelryforming component can be placed in different positions relative to each other. Also, the further element includes (a) a second magnetized portion that has a polarity that is different from that of the at least one other magnetic jewelry-forming component so that it is magnetically attracted thereto or (b) a retaining structure that prevents complete separation of the body member from the at least one other magnetic jewelry-forming component when the first magnetized portion of the body member has a polarity that is the same as that of the at least one other magnetic jewelry-forming

component so that it is magnetically repulsed therefrom. These components enable the jewelry article to be self-sizing by repulsion or attraction, to include the use of multiple fields to reduce damaging magnetic emanations from the article, or to control position or motion of the components in the article to provide highly desirable and unusual jewelry articles.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/10986

A. CLASSIFICATION OF SUBJECT MATTER IPC(7) : A44C 9/02 US CL : 63/3	
According to International Patent Classification (IPC) or to both national classification and IPC B. FIELDS SEARCHED	
Minimum documentation searched (classification system followed by classification symbols)	
U.S.: 63/3, 5.1,6,7,9,15,15.1,15.2,15.3,15.4,15.45,15.5,15.65,15.7; 446/92	
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched none	
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used) none	
C. DOCUMENTS CONSIDERED TO BE RELEVANT	
Category * Citation of document, with indication, where ap	propriate, of the relevant passages Relevant to claim No.
